What's New?
* Compatible with the latest Skype version;
As you maybe know, Skype decided to close its desktop APIs in 2014. Voice changing function is based on Skype API and that definitely made a compatible issue. We asked our customers to downgrade Skype to v6.8 which was compatible with AthTek Voice Changer for Skype. Now you can feel free to upgrade your Skype to the latest version, because voice changing function is coming back to Skype desktop APIs! Thank you all for your efforts on this!

* Arabic language interface supported;
Thanks to **Mohammad Ilyas Zewar** who helped us in Arabic translations. As usual, we will provide a license key for free to **Mohammad Ilyas Zewar** for thanks. Till now, AthTek Voice Changer for Skype supports up to 5 languages interface including English, Chinese, German, Polish and Arabic. If you are Arabian, welcome to use AthTek Voice Changer for Skype in your language!

* FaceBook, Twitter and Google Bookmark link added.
Some frequently used social media buttons have been added into AthTek Voice Changer for Skype's interface. If you want to share your experience with your friends or send us your feedback, please click any of the buttons and write down your words.
