Step.1 setup a local server.

😫 XAMPP Control Panel Application						
ខា	XAMPP Control Panel			Service	SCM	
Modules					Status	
Svc	Apache	Running	Stop	Admin	Refresh	
Svc	MySql	Running	Stop	Admin.		
Svc	FileZilla		Start		Explore	
Svc	Mercury		Start	dı in	Help	
Svc	Tomcat		S'	7 min	Exit	
XAMPP Co	ntrol Pan	el Ve si	1 . 5 (16.	March, 2011)		
Windows 6.1 Build 600 Lta form 2						
Current Directory Program Files\xampp Install(er) Directory D:\Program Files\xampp						
Status Check OK						
					-	
•		III			► at	

Step.2 copies all the files in 'WWW' folder and pastes them to the root of local server or a specified folder. The files in 'WWW' folder are default.wxo, index.htm and setup.exe.

Help	
:h 🦻 Folders 🛄 🕶	
355\RIA\webappkit_1.1\	www
Name 🔺	Size Type
👼 default.wxo	589 KB WXO File
🦻 index.htm	4 KB HTML Documer
🛃 setup.exe	727 KB Application
Help ch 😥 rs 🛄 •	
n\site\app	
Name	Size Type
🧟 index.hnl	8 KB Chrome HTM
🧖 default.wxo	587 KB WXO File
👼 setup.exe	687 KB Application
👰 index.htm	4 KB HTML Document
🧖 test.wxo	418 KB WXO File
jie.wxo	627 KB WXO File 🧹

Step.3 please input the address of local server with the saving path of index.htm to an IE or IE core browser (**important**). For example, the address of local server is 'http://127.0.0.1:8080' and you have pasted index.htm file to the root, then the correct test link should be: 'http://127.0.0.1:8080/index.htm'.

http://127.0.0.1:8080/index.htm Local Server Addr. Files in WWW folder have been pasted to the ROOT of local server

Step.4 presses Enter then you will be asked to install the IE Plug-in to load the test page correctly.

Welcome to use WebAPP Kit!

How to load this page:

- Please install the IE plug-in from <u>HERE</u> (first time only).
- Refresh your browser to load this page.

Note: WebAPP Kit can only work on IE or IE core browsers.

Step.5 after you have installed the IE plug-in, refresh your IE browser then you would see the following page and this means you have successfully deploy

WebAPP Kit to your local server.
