We have received many feedbacks about the functions of our AthTek NetWalk in the past two or three months. They all mean a lot to us because they provided direct views about AthTek NetWalk and many ideal suggestions on how to enhance AthTek NetWalk. Also some user has reported a little bug when packet sniffing. In this new released AthTek NetWalk, we have included all the features which have been mentioned in the feedbacks, and fixed the bug in packet sniffing.

As always, if you feel like to use AthTek NetWalk, but don't want to pay so much money for a license. Please join our [promotion program](#) to save money on AthTek NetWalk. You can save at least 20% from the original price, which the maximum discount is 100% free. Please, if you are looking for a powerful and affordable network monitoring and packet sniffing software, please download and try our AthTek NetWalk.
