

AthTek Skype Recorder v6.11 Has Been Released– Windows 8.1 Compatible!

January 11, 2014 | Development Center of AthTek Software

We have released a new version of [AthTek Skype Recorder](#) which has many new features included. As we promised, the new version is compatible with Windows 8 (8.1). If you already have a license for AthTek Skype Recorder, you can download the setup file from our official website and upgrade your version for free. **The new version also supports to send notification to contact when you start a recording as default. You can disable the auto-notification in Advanced Settings if you don't want to let the contact know of your recording.**

[Download and Install AthTek Skype Recorder v6.11 for Free](#)

What's New?

** Be compatible with Windows 8 (8.1);*

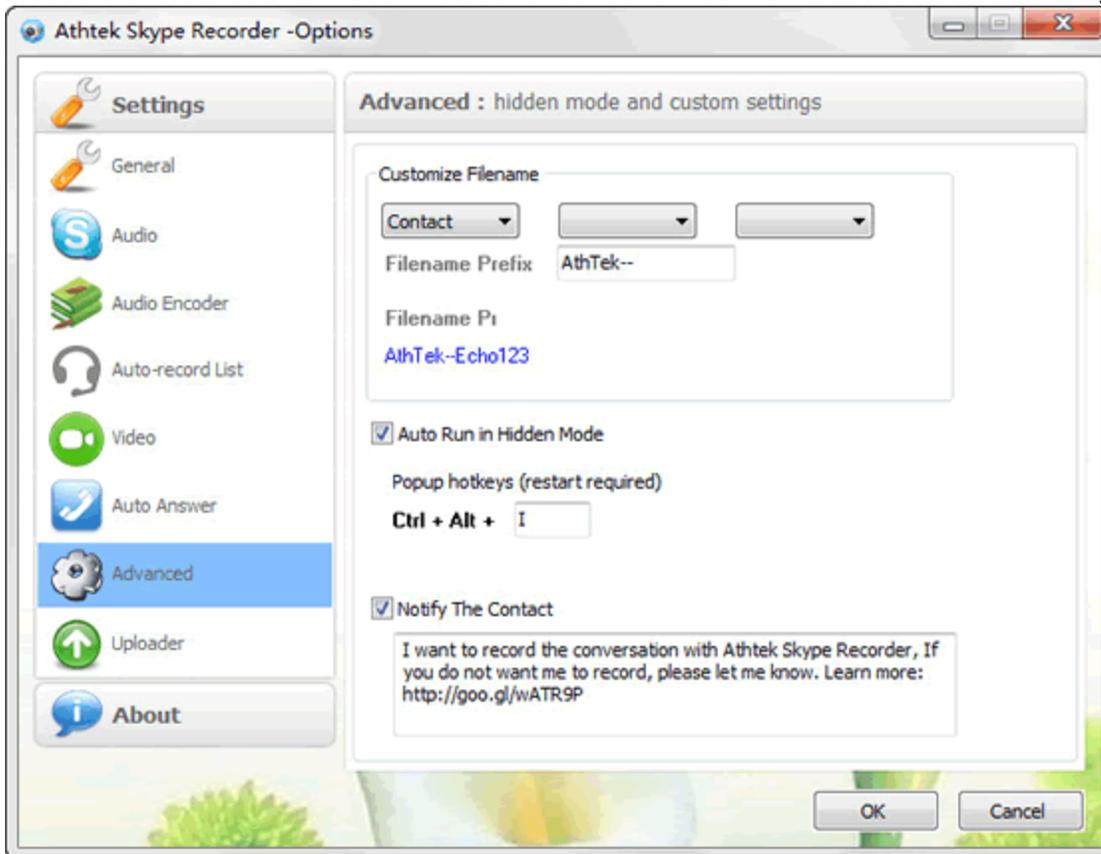

The previous versions can be used on Windows 8. But we have get some feedback of the compatible issue with Windows 8.1. We finally find what the problem is and get the compatible issue fixed in AthTek Skype Recorder v6.11.

** Supports to send notification to contact — Default;*

AthTek Skype Recorder supports to send a notification to contact automatically when you start to record Skype call. As we all know, call recording without permission is not a legal activity in some countries and regions. An auto notification will make your Skype call recording risk free. Auto notification is a default setting in AthTek Skype Recorder

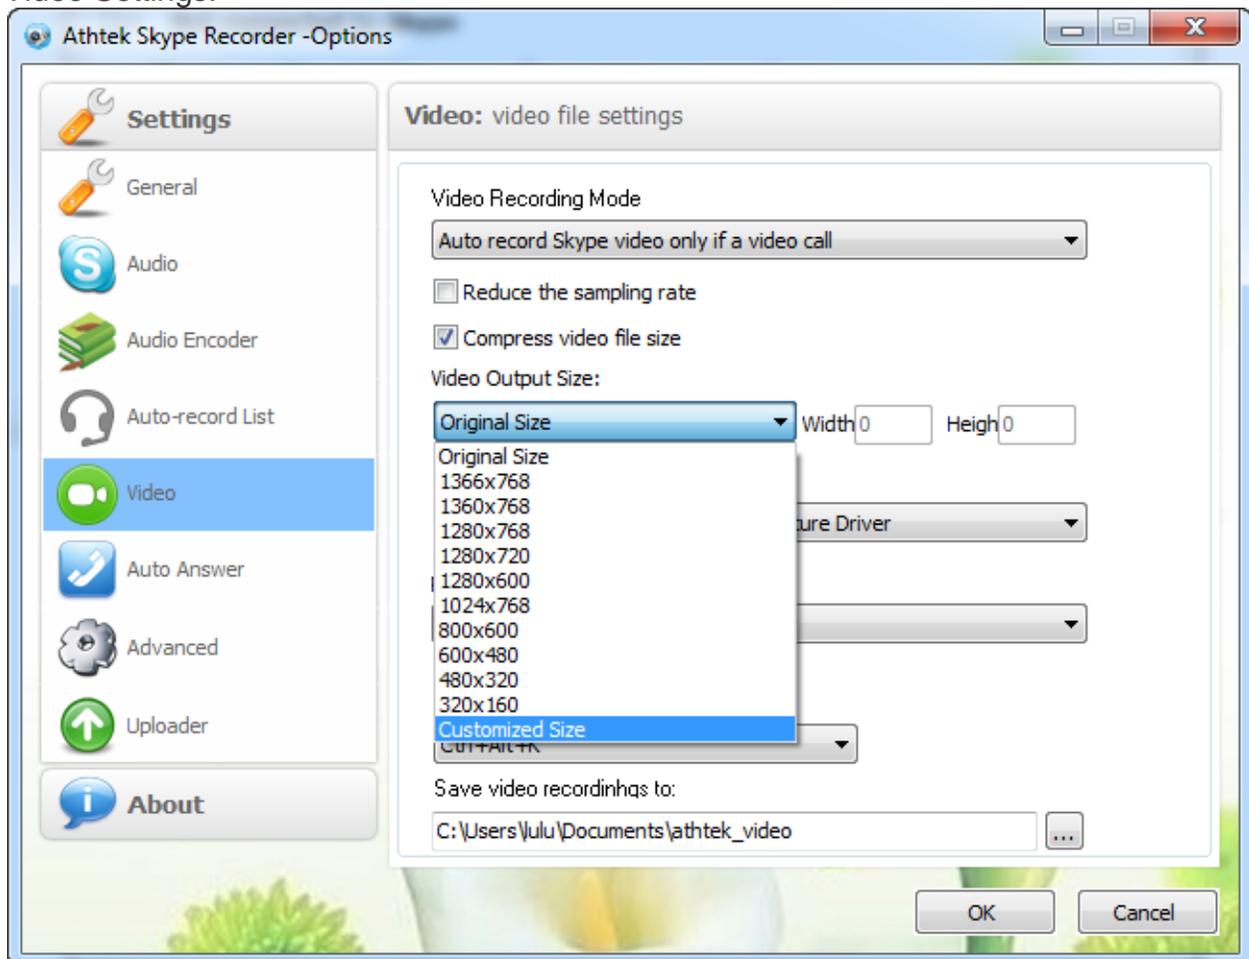

v6.11. The notification can be enabled/disabled and edited in Advanced Setting.

* Supports to alter the dimensions of video call recording;

AthTek Skype Recorder v6.11 supports to resize the video recording. This will help with lower the file size and provide a customized video feed. You can find this new option in

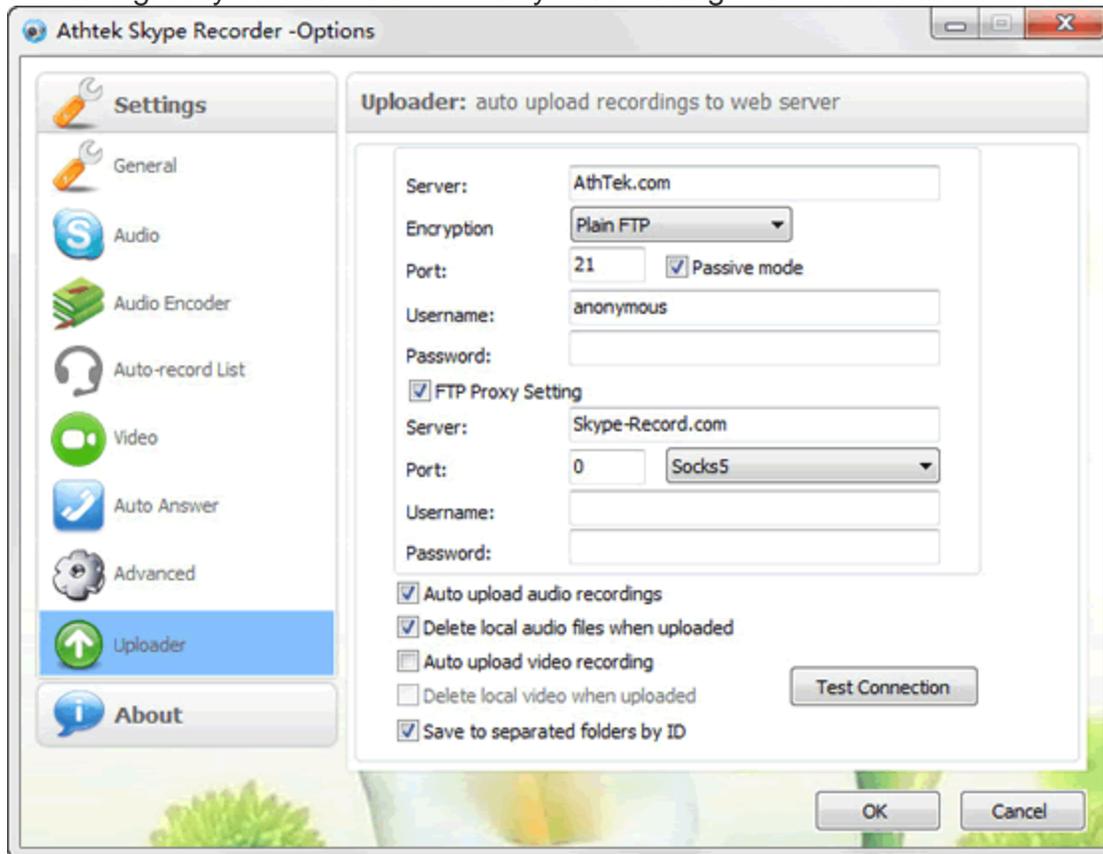

Video Settings.

* Supports to upload recordings via SFTP.

To some power users especially business users, how to upload the Skype call recordings to web server safely and automatically is an important question. AthTek Skype Recorder v6.11 supports to use SFTP to upload the recordings for power users.

This has greatly enhanced the security of recordings' data transmission.

* *Optimizes program translations;*

See? We have use new English translations! We hope this will make you better to use it in Skype call recording. If you have found any misspelling, please contact us to win a free license!

* *Removes non-Skype recording.*

We have removed some useless functions such as non-Skype recording. Anyway, if you still like this function, you can install an older version of AthTek Skype Recorder to discard the free update. Also you can just use Window voice recorder instead.
