

Skype Recorder for Mac Has Been Published

December 30 2015 | Developer Center of AthTek Software

We have just released [AthTek Skype Recorder for Mac](#). If you are using Skype on Mac, you can use AthTek Skype Recorder for Mac to record Skype calls now. We strongly recommend that you download it to your Mac and try it by yourself. Currently the application can only record audio in Skype calls. We will make it to be a full functional Skype call recording program, just like what we did on Windows.

[Download AthTek Skype Recorder for Mac for Free](#)

AthTek Skype Recorder for Mac has some similar features just like its Windows version.

*** Automatically records Skype calls.**

It starts automatically with Skype and get the entire conversation recorded. No matter you are in the office or at home, the application will help you to take audio memos to any Skype call.

*** Saves recordings in high quality audio files.**

It has the same audio recording quality as its Windows version. This means AthTek Skype Recorder for Mac supports [Skype call recording](#) for broadcasting.

*** Adds memos to each recording.**

It supports to add text memos to each recording. It would be a good habit to add some text tags to the call.

*** Supports smart recording panel.**

When it was in recording, a smart recording box will pop up for you to easily control the recording course.
