AthTek Call Recorder for Skype v6.90

July 15, 2015 | Development Center of AthTek Software

We have updated AthTek Call Recorder for Skype to version 6.90 with some new features included. The new version is available for downloading since July 15, 2015. Sometimes the auto update could failed to work on your computer, but you can always download the latest version at our <u>official website</u> at any time you wish. All users including free trial users are allowed to download and use AthTek Call Recorder for Skype 6.90 for free. If you are using an old version of Call Recorder for Skype, we highly recommend you to download and install the latest version for Skype call recording.

What's New?

* Optimizes the hot keys section in hidden mode.

In previous version users can set the popup hot keys to any key on the keyboard, but sometimes the hot keys doesn't work on some special keys. In AthTek Call Recorder for Skype v6.90 we limit it to 26 English letters and it will be easier for user to pop up the recorder on to desktop.

Uploader	C:\Users\SWB-001\Documents\athtek_record
About	Load recordings in default path

* Intelligently speeds up the recorder when necessary.

The new AthTek Call Recorder for Skype will remind you to transfer the old recordings to another place when there were too many items or they took too much space. This will help you to speed up AthTek Call Recorder for Skype to get a better performance.

* Unselected auto notification is as a default.

In AthTek <u>Call Recorder for Skype</u> v6.90, we make the auto notification to be unselected as default. We found some users don't even know this message will be sent out automatically when they were using AthTek Call Recorder for
