

We are going to release a new website special for [Reinstall DirectX EZ](#). It has the same site template with our [Registrycleaner](#) and includes more useful information of DirectX solutions.

You would not be new to DirectX if you are a game lover. Sometimes when you are trying to login DOTA, you find that a popup comes out to your screen – **fatal DirectX error**: code 5. You search throughout the internet for a solution, but the only thing you get is to reinstall your operating system to recover the DirectX file.

Now you don't need to reinstall the entire operating system any more, [Reinstall DirectX EZ](#) can help. The only thing you need to do is to insert the system disc, then the toolkit will automatically extract necessary DirectX files from the disc and [repair DirectX](#) in minutes. This is the most convenient way to fix [fatal DirectX errors](#) in the world.
