

We have already released a [new version](#) of [AthTek Skype Recorder](#), with many features enhanced. The new version comes with a 3.08 MB size exe file and will provide better user experience in **Skype recording**.

### [Download Free Trial Of Skype Recorder V5.5.1](#)

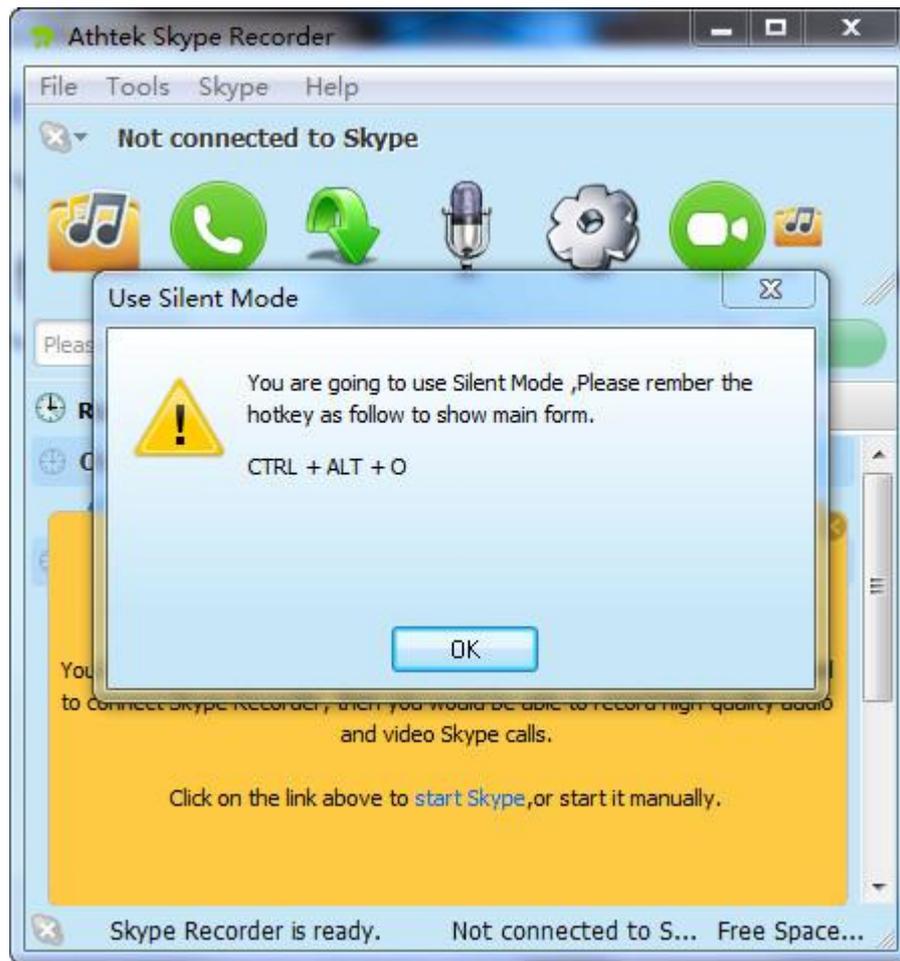

#### What's new?

##### \* enhance Silent Mode for Skype [parental control](#);

Last month **Mr. Edward** has suggested that a nice Skype Call Recorder should allow users to block the popup menu in Silent Mode. Because it is sometimes boring to close the popup menu frequently when you are in Stealth Mode. We add an option to enable users to block the popup menu conveniently You'd better remember the hot keys carefully without the popup

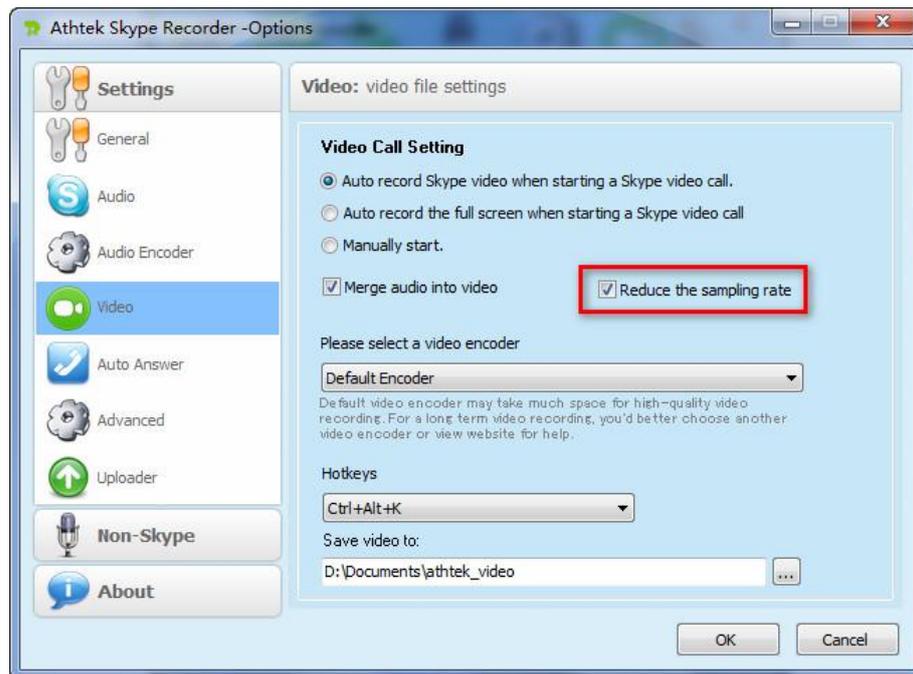

menu!

**\* add an option to change the sample rate;**

You are allowed to set the sample rate for **video recording** of [Skype Call](#)

## Recorder.

### \* fix a bug in saving video recordings;

In the previous version of [Skype Recorder](#), sometimes you cannot change the Skype video saving path to another destination folder. This is a little bug and it has been fixed in Skype Recorder v5.5.1.

### \* correct a link in auto updates;

When use the live update service of an old version Skype Recorder, the guide line may lead you to another site by mistake. We have cancelled the link in live update since Skype Recorder v5.5.1.

### \* fix a bug of duplicate codec.

**Tony Jennings** has reported that there would be duplicate video codec in our encoder list. This means that video codec has been loaded twice in our Skype Recorder. This problem has been removed in the latest version of Skype Recorder.

If you are looking for a [call recorder](#) which can automatically [record Skype chats](#) with high quality audio and video formats, you should take a little time to download and try our Skype Recorder. It has been awarded as “**The Most Valuable Skype Recorder in 2011**”!
