What's New?

*** Supports to test video call recording.**

AthTek Skype Recorder v6.50 supports to test video call recording. With any of previous versions, users can test Skype audio call recording with Echo.

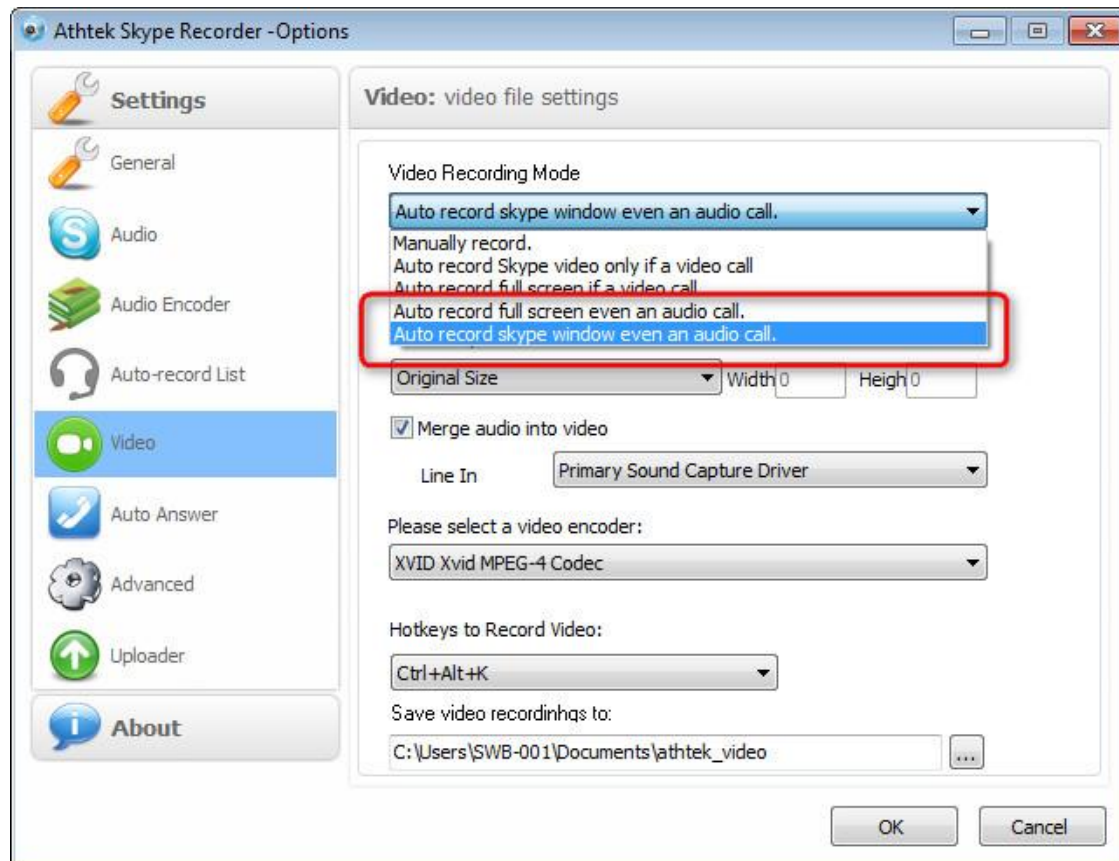

Since AthTek Skype Recorder v6.50, users can also test Skype video call recording with Echo. When it was the first time to record Skype video call, user will see a video test link in “Recent Video” tab. Click on the link user will start a call test with Echo and AthTek Skype Recorder will record the chat as video.

*** Supports to record Skype window in audio call.**

In Tools > options... > Video > Video Recording Mode, users will see a new option of “Auto record Skype window even an audio call.” If user chose this option, AthTek Skype Recorder will record Skype’s screen in video even if it

was an audio call.

*** Be compatible with Skype 7.1.**

Skype changed its APIs again in Skype 7.1 and some of the recording features involved. We have to make a progress to be compatible to the latest version of Skype. If you found compatible problem with the older versions, please download and install AthTek Skype Recorder v6.50 and then the problem will be solved.
