

The Only Call Recorder Which is Compatible with Skype App

You can find many [Call recorders for Skype](#) in Google's search result. But if you were using Skype App for Windows 8.1, you could hardly find a call recorder which was compatible with Skype App. This is mainly because almost all Skype recorder software requires desktop version of Skype. If you are using Skype App which doesn't have desktop APIs included, you are not able to record Skype calls with those call recorders. In this article, you will read instructions to the only call recorder which is compatible with Skype App.

[Download and Try AthTek Skype Recorder v6.10 for Free!](#)

[AthTek Skype Recorder v6.10](#) doesn't require Skype APIs to work, so that it is fully compatible with Skype App. These days, many customers asked the same question to us: does AthTek Skype Recorder support to work on Skype App? The answer is YES. Till now, AthTek Skype Recorder v6.10 is the only call recorder which is fully compatible with Skype App on Windows 8.1. If you are looking for a call recorder for Skype App, you are at the right place to have it!

Besides being compatible with Skype App, AthTek Skype Recorder v6.10 has other unique features. It can add watermark to video recording. You can add either text watermark or graphics watermark to the

video call you are going to record. This will greatly help with your identity if you are a broadcaster.
