Have you ever played with the funny voice game – Talking Tom on iPhone? If yes, you would probably know what the **Skype Voice Changer** is. The talking Tom will record a temporary talk and repeat it in Tom's voice. The voice looks like you pinch your nose and speak in a cutesy voice which makes you laugh for a day. But this app can only soliloquy and it cannot make you to use Tom's voice.

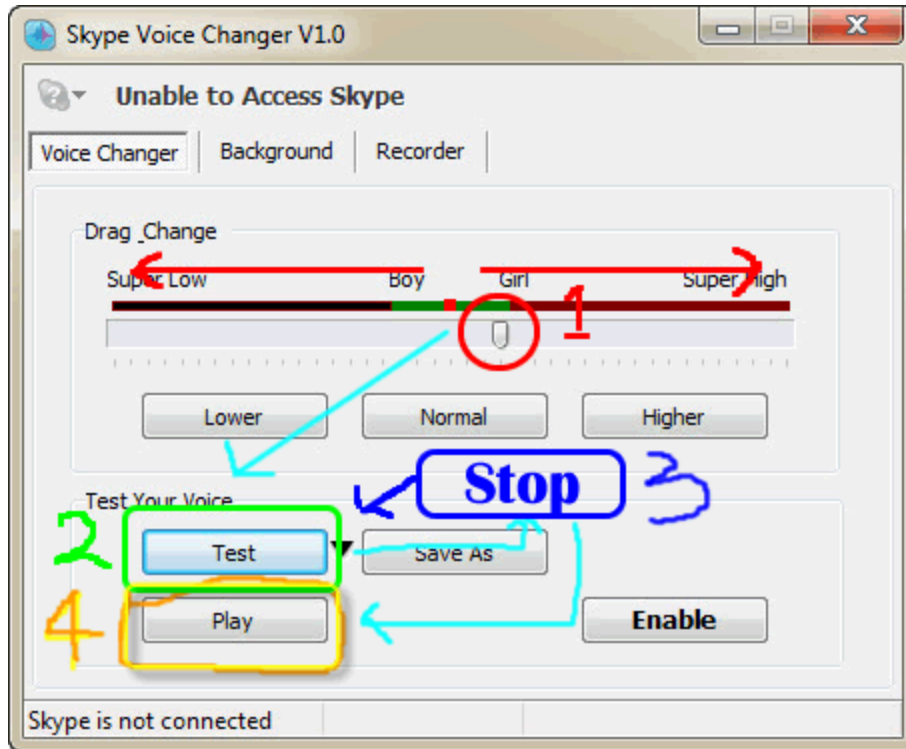

AthTek **Skype Voice Changer** makes this application on Windows system for Skype users. The program was produced by the same development team of [AthTek Skype Recorder](#), thus it has the same high [Skype voice recording](#) quality. It can not only change your voice to Tom, but also to a man or even a robot. It also supports to add background music to the Skype call. This will be useful if you want to simulate the surroundings in a Skype call. For the current version, you can only record changed voice in Skype call.

If this is the first time you run AthTek **Skype Voice Changer**, you should read the following passages carefully. I will show you how to use this application to change your voice in a Skype call.

Before you can change your voice in a Skype call, you should select your favorite voice first. Simply drag the pointer left or right and your voice will be changed from dull to sharp. Then you should press “Test” button and speak to the microphone to test the voice effect. Say something and press “Stop” to end the voice test. Now you can press “Play” to listen to what you have said just now in the changed voice. Test the voice for several times and you will find a favorite voice effect.

Now you can get your Skype connected to **Skype Voice Changer** and start a Skype call to use your new voice. It will change your voice flexibly in the Skype call and play jokes to your friend.
